Antenatal care coverage was associated with lower infant risk only after maternal Tdap introduction
Bayesian BYM2 models adjusted for poverty (IPM), rurality, Indigenous and Afro-descendant share, and population density
Antenatal care (% births with ≥4 visits)
Pentavalent coverage (pre-epidemic period)
2011–2013, infants <1 y (pre-maternal Tdap)
2011–2013, all ages
2025, infants <1 y
2025, ages 10+ (negative control)
2025, all ages
Change 2025 vs 2015–2019
